- C#
- C
- PHP
- Python
- SQL
- Matlab

Marc Anglés Castillo

Software Developer

About me

Developer with a strong passion for coding.

Colaborating at Nakshisoft as Game Developer creating an exciting tower defense for Windows in Unity.

Studied a Computer Engineering Degree at UB - Universitat de Barcelona.

Multifaceted programmer with experience in multiple programming languages and technologies such as Unity, RESTful APIs with SpringBoot, Unreal Engine 4, Java JSP, JS Bootstrap or PL/SQL among others and Currently I'm growing by learning React.js.

I'm also well versed in the Agile Methodology and used it, although sometimes with a flexible perspective on what Agile means, in most of the projects I've been assigned to as developer.

In a more personal field I enjoy my free time with a wide variety of hobbies like videogames, boardgames, woodworking or inline skating. I also help, with my partner, in local animal shelters by fostering orphaned kittens during the first stages of their lives until they are ready for adoption.

Work Experience

Cloud Developer

GFT (Sant Cugat) | 01/oct/2017 - 20/sep/2024

- This team was developing a custom and native version of Openshift for Google Cloud. We worked with github actions and Terraform to deploy solutions when merging changes to the main branch.

Salesforce Administrator and Helpdesk

- Helpdesk and administration of a company wide Salesforce and Kimble org focusing on technical issues more than functional ones. I was the main responsible of this tasks in the team.

Java developer

- Implementation of a tool in JSP for banking
- Implementation of the backend in Java and a custom Spring framework

3DTech OmegaZeta | 04/jul/2016 - 04/jun/2017

Unreal Engine and Monodevelop developer

- Implementation of an interactive screen in Unreal Engine 4 for the Natural History Museum in Doha, Qatar
- Implementation of an interactive screen in Monodevelop for the Natural History Museum in Doha, Qatar

GFT (Sant Cugat) | 28/jun/2015 - 04/jul/2019

Junior Java Developer

- Implementation of tools for banking in Java, JSP with SQL databases and REST architecture.
- Usage of agile methodology
